From Grand Village to Bluff City: 300 Years of Natchez History
Upper and Lower Main Galleries, Hill Memorial Library
The Mississippi River’s fertile flood plain coupled with its role as a major economic artery connecting north and south firmly established the links between Natchez, Miss., and Louisiana early in their development as outposts of the colonial empires of multiple European powers. That connection continued into their respective American territorial periods, and by the antebellum era planters in the area had fully exploited this geographic partnership, taking up residence in Natchez city proper while keeping a firm eye on their profitable plantations across the river. Joined more than divided by the river, Natchez and Louisiana continue to have social, cultural, and economic ties.
